

Plant order opportunity Sunset Valley orchids

There is going to be one more order from Sunset Valley orchids that should arrive the 1st week of March. Fred has sent us a preview of his extensive spring list (attached) so that orders can be made immediately. All orders must be in to Terry Kennedy(ourtropics@gmail.com) by **Monday February 18, 2019**. Cost of plants FOB our place will be 2 x US= CDN e.i. a \$14 listed plant will be \$28 Canadian

2019 Cattleya list

Mini-Catts

SVO 6259

Sl. Minipet

(Sl. Orpetii 'Kathleen' AM/AOS [3344](#)x Soph. coccinea 'Higher Ground'[2446](#))

This is one of the best solid red mini-catts available and will easily bloom in 3" pots.

Both of the parents are tetraploids, which will create excellent flower form. Orpetii is a primary hybrid (L. pumila x Soph. coccinea), and coccinea 'Higher Ground' originated in Japan and is one of the very best, with perfectly flat 3" flowers. The genetic makeup of this grex is approximately 75% Sophronitis and 25% Laelia. These look like super good Soph. coccineas and are proving to have larger flowers than the original cross, and the plants are much easier to grow and bloom.

3" pots \$15

SVO 6919

Slc. Angel's Fantasy

(Slc. Bright Angel 'Red Knight' [726](#) x Slc. Fire Fantasy 'H&R' [2721](#))

An exceptional remake of a very nice mini-Catt offered here. These will mostly be red flowers with yellow flares, expect 2-3 per inflorescence. Check out a picture from the first batch [Picture 1872](#)

3" pots \$16

SVO 6927

(Slc. Love Fresh 'Peter' [4390](#)x Lc. Dennis Olivas 'The Best' AM/AOS [1293](#))

A very cute mini-Catt is Love Fresh (Sc. Beaufort x L. briegei) it has shapely bright yellow flowers with red lips, these small plants form tight clumps of pseudobulbs in a small foot print. The big clusters of starry shaped flowers produced by Dennis Olivas (Trick or Treat x Penny Kuroda) are spectacular, with their yellow blooms with red flares commanding attention. Breeding down the large plant size while keeping the good flower attributes can be challenging, with this cross that is the expectation. Love Fresh will reduce plant size, making for a compact growth habit, it will reinforce flower color, and stem strength. The Dennis Olivas will add its flower count, color, stem strength.

This hybrid will make for some very cute small growing plants with showy flowers.

3" pots \$14

SVO 6963

(Slc. Mem. Trudy Marsh 'Sun Flare' 2946 x Slc. Sunrise Fantasy 'Diamond Orchids' AM/AOS2940)

Memoria Trudy Marsh is (Tangerine Jewel x Cosmic Delite) is only 4" tall the 2.5" flowers are yellow/orange and have interesting flaring on the petals. They flower two time season and have long lived blooms. Sunrise Fantasy (Sl. Pole-star x Slc. Fire Fantasy) has red flowers with bright yellow flares on the petal; the upright stems hold 3-4 flowers above the foliage. Both of these are mini-Catts with eye catching flower color. This breeding for the development of a more dramatic style of petal flaring; I am calling it 'Candy Stripe' as the red veins are highlighted by a yellow background. Very novel new breeding

3" pots \$15

SVO 6965

(Pot. Angel's Dream 'SVO' HCC/AOS 708x Slc. Mem. Trudy Marsh 'Sun Flair'2946)

I really like red flowers with yellow flares on the petals, Angel's Dream is one of the best with this color combination its parents are (Lc. Mari's Song x Slc. Bright Angel) when you have C. intermedia v. aquinii based hybrids like this the lip color is expressed on the petals. This phenomenon is easily seen in Angel's Dream, to see more pictures of its breeding phenomena check out cross number SVO 6955. Trudy Marsh is (Tangerine Jewel x Cosmic Delite) this mini-catt stands only 4" tall the 2.5" flowers are yellow/orange and have interesting flaring on the petals. Both of these parents flower two times season and have long lived blooms. Mem. Trudy Marsh will reduce plants size making this a mini-catt and assure the dramatic coloring and flaring of the petals. The first two to bloom were very nice [Picture 4299](#) [Picture 4458](#)

3" pots \$15

SVO 7009

Sc. New Year's Gift

(Sc. Batemanniana 'Betty' 4n 2953x Sc. Beaufort 'Big Circle' 4n 804)

I have referred elsewhere in this list to "Candy Stripes" This is breeding for the development of a more dramatic style of petal flaring where the red veins are highlighted by a yellow background. Batemanniana (Soph. coccinea x C. intermedia v aquinii) is in the background and is responsible for this "Candy Striped" look. The cultivar 'Betty' is a rare tetraploid (4n) variety which was imported from Australia. Beaufort (Soph. coccinea x C. luteola) is the most influential parent of Mini and Compact Cattleya breeding with over 216 offspring with 1294 progeny!! It is dominant for flower shape and diminutive plant stature. This cross was not easy to make as 'Betty' is reluctant to hold pollen and form a capsule. After several attempts here it is. I have high expectations for this cross, with many flowers exhibiting the desired red veining on the yellow petals but some will have red veins on coral colored petals. The blooms will be well rounded as there is considerable influence from Soph. coccinea and that same influence will limit flower to 1-2 per inflorescence.

3" pots \$15

SVO 7028

Slc. Lucky Chance

(Lc. Tokyo Magic '6-1' AM/AOS 835 x Sc. Beaufort 'Luna Rousse' 1227)

Almost a mini-catt, Lucky Chance is a little to big to fit the category, they mature at 7" tall. So they are more like large mini-catts. The attractive well shaped yellow flowers have bright red lips and are held just above the foliage. These will flower well in 3" pots and are mature in 4" pots.

3" pots \$14

SVO 7034

Pot. Pure Love

(Blc. Love Sound 'Dogashima' AM/AOS 4061 x Slc. Seagulls Apricot 'Majestic' 2203)

This cross was first made by SVO in 2000, amazing to think that was 19 years ago. I still have 3-4 cultivars of those original plants; they have proven themselves reliable growers and bloomers. That was one of the motivations to make Pure Love again, the other is that this pairing produced what I call flowers of 'High Average of Quality' that is, every plant that bloomed had good to excellent flower shape, color and growth habit. This is a winning combination. Pictures from the original cross [Picture 2440](#) [Picture 1316](#)

[Picture 1459](#)

3" plants \$15

SVO 7036

(Slc. Angel's Fantasy 'Solar Flare' FCC/AOS 1870 x Sc. Beaufort 'Hartford's Elwood' AM/AOS 458)

Angel's Fantasy is particularly nice, the flowers are just spectacular, and the FCC/AOS award says a lot about the flower quality. This plant is also a good grower and flowers twice a year. Beaufort has a long history of breeding excellent mini-catts and is one of the most important mini breeders, as it produces reliably high-quality offspring. The flowers of this cross will have excellent round shape in yellow sunset colors many with dark red flares. These will bloom in 3" pots twice a year. Everyone has space for one these! First to bloom plant, super nice! [Picture 3981](#)

3" pots \$16

SVO 7129

(Slc. Cosmic Delite 'SVO' HCC/AOS481 x Pot. Louise Clarke 'Outstanding'2194)

Cosmic Delite (Slc. Bright Angel x Sc. Batemanniana) is a mini-catt with amazing flower color - yellow with a bold red overlay of red flaring. You have read about my wife's name sake, elsewhere in this list, here is my mother's name sake, Louise Clarke (Slc. Golden Circle x Pot. Rubescence) 'Outstanding' is just an amazing flower with flat, wide petals, true red color excellent lip shape, and easy to bloom, everything you mother's namesake should be. This is a mini-catt that is on the larger end of the scale. The flowers will come in two color possibilities; about ½ will be of excellent shape in solid red the other ½ will also be well shaped but the red flowers will have yellow flares and red veins on the petals. This style of breeding is what I call 'Candy Stripe', we are just beginning to develop this new look. I am very hopeful about this, it might be the best yet.

3" pots \$15

Compact Cattleyas

SVO 6711

(Lc. Koolau Seagulls 'Volcano Queen' AM/AOS 4236 x Pot. Star Fire 'Rubens' 2566)
Koolau Seagulls is an interesting hybrid, based primarily on four species: *C. leopoldii*, *L. milleri*, *L. cinnabarina* and *C. dowiana*. The cultivar 'Volcano Queen' is very impressive with has 13-15 well-arranged deep red flowers on a long and sturdy inflorescence well above the foliage. Star Fire (Lc. Trick or Treat x Pot. Rubescence)' has deep red flowers with full shape on a strong stem, it is proving to be a good parent in this style of breeding. This new grex will produce superb stems of well-arranged, solid red flowers held above the foliage.

3" pots \$14

SVO 6861T

L. Autoceps

(L. autumnalis f. alba 696 x L. anceps v. roeblingiana 'Disciplinata' HCC/AOS1609)
Here is an interesting cross between a couple non-standard color forms of two Mexican *Laelia* species. I expect that a few will be white with purple flecks (very desirable), some will be pink with purple flecks (nice) and some will be pink with no flecks (okay). Flower count will be improved to 5-7 per stem, and these should bloom in November before anceps usually flowers. These plants have been treated (*T*) with Oryzalin, a chemical used to convert diploids into tetraploids, and are very limited in supply.

3" pots \$20

SVO 6896

(Lc. Twilight Song 'SVO' AM/AOS 3602 x L. anceps 'Flare' 2596)

This is a great new spin on one of our favorite types: Twilight Song (anceps x walkeriana) has 7-8 flowers per in florescence the are a lovely soft pink of exquisite shape, L. anceps 'Flare' produces 5 flowers on long arching stems with lavender flowers with darker petal tips. By breeding back to L. anceps will give offspring reminiscent of L. anceps, with long arching stems and lavender color. The flower size and form will be improved well beyond the species and we believe flower count will come in at 5-6 per.

This will look like super improved L. anceps! Very limited supply, if you like L. anceps this is a great add to your collection

3" pots \$20

SVO 6909

(Lc. Maui Plum 'Volcano Queen' AM/AOS 894 x Lc. Jalapa 'SVO' Select' 4n 3145)

Maui Plum (Lc. Summerland Girl x *C. leopoldii*) blooms with strong inflorescences that can produce as many as 26 dark mahogany flowers with a few random burgundy spots and a contrasting lip. This is a tetraploid or (4n) Jalapa (*L. milleri* x *C. leopoldii*) their flowers are very dark deep red with even darker burgundy spots, strong stems hold them high. This breeding is designed to reduce the plant height of Maui Plum while keeping the good qualities; like floriferousness, flower color, and shape. Plants will have closely

spaced rhizomes thanks to the influence of *L. milleri* and plants should begin to flower in 3" pots and mature in 4" pots. Very Limited
3" pots \$18

SVO 6926

(*C. Dubiosa* 'Scully's' HCC/AOS 4075 x *Lc. Hsinying Excell* 'DG' HCC/AOS 699)
Dubiosa 'Scully's' (*trianae* x *loddigesii*) has a charm to it's the floral aspects that is quite appealing, the long-lived flowers easily last for 2 months. *Hsinying Excell* (*Lc. Excellescombe* x *L. briegei*) a very attractive flower with light lavender flowers and purple flaring on the petals and sepals. The shape is nicely rounded, and the strong stems holding 7-8 above the foliage and the dark purple. Its compact growth habit is a great attribute and will make for attractive plant habits in its offspring. Here we are expecting light pink/lavender flowers, many with purple flaring on the petals. The stems will hold the 5-6 flowers above the foliage and flower will have excellent lasting qualities.
3" pots \$14

SVO 6930

(*Blc. Love Sound* 'Dogashima' AM/AOS 4061 x *Pot. Dream Circle* 'SVO' AM/AOS 638)
Love Sound (*L. briegei* x *Blc. Bouton D'Or*) has proven its self as a valuable breeder over and over again it has many great hybrids to its credit, *Dream Circle* (*Circle of Life* x *Hisako Akatsuka*) has a fuchsia-rose-purple color, it is very hard to describe. The flowers are beautifully shaped with well rounded form and a full lip. Check out the first to bloom [Picture 3076](#) it was so good I gave it the 'SVO' cultivar name! What a combination, beautiful shape and color combination.
3" pots \$14

SVO 6937

(*Pot. Martha Clarke* 'Orange Tart' 1522x *Blc. Love Sound* 'Dogashima' AM/AOS 4061)
Line breeding can often give excellent results; *Martha Clarke* (*Slc. Circle of Life* x *Blc. Love Sound*) has been a high quality hybrid with many fine cultivars and AOS awards. By breeding to what I feel is the best 'Orange Tart' back to *Love Sound* 'Dogashima' will produce more yellow colors with most having a blush or flares of red or peach tones. The stem strength will be improved and flower form will continue to be well rounded, flower size will be reduced but flower count should increase. All in all this is looking like it will be a note worthy hybrid.
3" pots \$14

SVO 6943

(*Pot. Rosebud* 'Carmela' 185 x *Lc. Culminant* 'La Tuilerie' AM/AOS 2584)
The purple flowers with purple flares of *Rosebud* (*Pot. Ronald Hausermann* x *Lc. Mini Purple*) combined with its large size; full shape and a flat form make it a real show stopper. *Culminant* is the parent plant behind the famous hybrid *Circle of Life*, developed by the late Frank Fordyce. The flowers of *Culminant* have the large classic look of yesteryears breeding. I believe it is not yet time to put the plant out to pasture, as it still can impart excellent qualities to its progeny. Here we are expecting the flat full shape of *Rosebud* combines and the large flower size of *Culminant* will combine to bring out the

best qualities of both. These have all the potential to produce huge flowers on compact plants in dark purple.

3" pots \$14

SVO 6944

(Pot. Hisako Akatsuka 'Volcano Queen' HCC/AOS 2052x Slc. California Apricot 'Orange Circle' HCC/AOS 1509)

Hisako Akatsuka has sired several superior hybrids, it is known to pass along it's fine flower shape, color and compact plant growth habit. California Apricot has a prestigious heritage as a quality breeder, it has created many well-known hybrids with 3 standouts in particular: Hazel Boyd, Final Touch, and Seagull's Apricot it's amazing that these 3 have received 89 flower quality awards!!! When these good breeding qualities come together the expectation is high... to say the least. Compact plant habit, twice a year flowering, bright red to red/purple flower color, with extra fine flower form, and full shaped darker lips.

3" pots \$16

SVO 6948

(Pot. Golden Circle 'OPRL' 2296x Pot. Angel's Fantasy 'Solar Flair' FCC/AOS 1870)

Golden Circle (Blc. Goldenzelle x Slc. Circle of Life) is a reliable breeding plant. The cultivar name 'OPRL' stands for **O**range **P**etals **R**ed **L**ip. 'OPRL' has superb form with 3.5" orange flowers and red lips that bloom twice a year on 6" tall plants it imparts size, shape, and color. The parents of Angel's Fantasy are (Slc. Fire Fantasy x Slc. Bright Angel) 'Solar Flare' FCC/AOS is really a spectacular flower with amazing color and small growing plant habit. The expectation is for excellent shape, with over half having petals with bright yellow flares surrounded by red. Fantastic color possibilities with this cross!

3" pots \$15

SVO 6955

Slc. Angel's Dream

(Lc. Mari's Song 'CTM 217' HCC/AOS 399 x Slc. Bright Angel 'Red Knight'726)

There is an interesting characteristic that occurs in hybrids with *C. intermedia* v. *aquinii* in their breeding; the lip color is often expressed on the petals. Mari's Song (*C. Cherry Chip* x *Lc. Irene Finney*) is just one of these hybrids and has a long history of breeding flared flowers. The bright red color of Bright Angel (*Slc. Precious Stones* x *Soph. coccinea*) will dominate the color of the offspring and the yellow area centrally on the will often appear as flares in the central area of the petals; so if the parents have a lip with a yellow spot centrally that will express its self as a yellow flare. The majority of these will be red flowers and yellow flares in the center of the petals, the reverse of the color patterns usually seen. Very cool hybrid. Take a look at this **Picture** 823

3" pots \$15

SVO 6959

(Pot. Paradise Rose 'My Valentine' 1098x Pot. Rubescent Fire 'Fire Bomb' 2229)
Paradise Rose (Slc. Pink Doll x Blc. Toshie Aoki) has intense color and shows an interesting phenomenon of color dominance. The flowers of Blc. Toshie Aoki shows the strong influence from *C. dowiana*, with bright yellow flowers and red lips, like *C. dowiana* the flowers of Toshie Aoki are recessive for color but intensify purple dramatically. Pink Doll has dark purple flowers the hybrid Paradise Rose combines these traits and produces intense crimson-red-purple flowers. Rubescent Fire (Lc. Spring Fires x Pot. Rubescence) has produced red hot reds, with great color, great shape and strong stems. These offspring are going to have incredibly intense red color, superior shape, well-supported flowers, a compact growth habit and the tendency to flower twice a year. Truly the epitome of the modern red compact Cattleya! Very limited
3" pots \$20

SVO 6962

(Pot. Higher Multiplier 'Shocking Red' 2533x Pot. Jersey Summer 'SVO' 1860)
This is state of the art red breeding. Higher Multiplier (Pot. Rubescence x Slc. Pink Doll) has excellent flower shape, beautiful red color, the plants flower twice a year and mature plants fit nicely in 4" pots. Jersey Summer (Pot. Paradise Rose x Pot. Dream Circle) are full formed flat flowers with intense fuchsia color. Look for superior color with this hybrid an amazing intense red/fuchsia, flat flower of excellent shape, and compact plants that flower twice a year.
3" pots \$16

SVO 6980

Pot. Glenda Lask

(Pot. Little Toshie 'Gold Country' AM/AOS 1094x Slc. Fire Fantasy 'H&R'2721)
Little Toshie (Blc. Toshie Aoki x Sc. Beaufort) 'Gold Country' is a superb grower, with excellent flower quality and color, and blooms 2-4 times a year is compact growing and overall an excellent plant. With a long history of success Fire Fantasy is well known for its ability to breed flowers with flares. We are expecting well-above-average flower shape with large full lips. Many flowers will be in sunset colors with bright contrasting flares on the petals and they will flower 2x a year. The compact plants will mature at 6 to 7" tall. I have high expectations for this cross.
3" pots \$16

SVO 6981

(Pot. Picotee Flight 'SVO Picotee' 1777x Slc. Mem. Trudy Marsh 'Sun Flair'2946)
The flowers of Picotee Flight (Horizon Flight x Love Sound) have a nice color combination: the yellow flowers have a beautiful red picotee around the petal margins. The plants also have sturdy stems holding 5-7 flowers above the foliage. Trudy Marsh is (Tangerine Jewel x Cosmic Delite) standing only 4" tall the 2.5" flowers are produced twice a year and are yellow/orange and have interesting flaring on the petals. I believe that Mem. Trudy Marsh is going to develop dramatic petal flaring with this hybrid. The flowers will be well and the compact plants will mature at 7-8" tall
3" pots \$14

SVO 6998

(Slc. Pat Thrall 'Magenta Fire' AM/AOS 3984x Pot. Jerry Rehfield 'Paradise Fuchsia')
As the name says 'Magenta Fire' is fitting for this cultivar of Pat Thrall (Lc. Bonanza Queen x Slc. Circle of Life) the flowers are magenta-pink with excellent shape and very wide petals, it really is a beautifully formed flower; the plant is a large compact type that stands just about 10" tall. The flowers of Jerry Rehfield (Pot. Hisako Akatsuka x Pot. Hawaiian Prominence) have an intense magenta-fuchsia color with a beautiful lip sporting a bright yellow center; it's quite a color contrast. The flowers are of excellent shape and substance with a plant that's 8" tall. Magenta should be the name for this hybrid! The flower color is going to be spectacular. Flowers will be around 4" have great shape and the plants will be compact maturing at 8" tall, overall this is looking very promising.

3" pots \$16

SVO 6999

(Lc. Spring Fires 'Lynette #1' 1303x Pot. Star Fire 'Rubens'2566)
Spring Fires (Lc. Fires of Spring x Lc. Fire Island) has strong upright stems carrying 5-9 red flowers with darker red lips. It has proven to be an excellent parent, with dominance for color, strong stems and bloom period. The flowers of Star Fire (Lc. Trick or Treat x Rubescence) are deep red and produced 5-7 on a strong stem. This grex is the continuation of a long process of breeding steps aimed at developing the perfect head of well formed, intensely-colored, deep red flowers, held high on sturdy stems.

3" pots \$14

SVO 7000

(Pot. Hawaiian Prominence 'America' AM/AOS 1848x Pot. Dream Circle 'SVO' AM/AOS638)

The intense purple-red color and bright yellow throat of Hawaiian Prominence (Hisako Akatsuka x Slc. Wendy's Redstone) commands attention, its well-shaped flowers are also displayed nicely on good strong stems. Dream Circle (Circle of Life x Hisako Akatsuka) has a fuchsia-rose-purple color, it is very hard to describe. The flowers are beautifully shaped with well rounded form and a full lip. Amazing intense colors combined with excellent form, this has tremendous potential.

3" pots \$15

SVO 7001

Pot. Spring Prominence

(Pot. Hawaiian Prominence 'America' AM/AOS 1848 x Lc. Spring Fires 'Lenette #1' 4248)

One of our long term breeding goals is the development strong stems holding heads of well shaped reds. This cross incorporates parents with the key traits towards this development. The intense purple-red color and bright yellow throat of Hawaiian Prominence (Hisako Akatsuka x Slc. Wendy's Redstone) commands attention, its well-shaped flowers are also displayed nicely on good strong stems. Spring Fires (Lc. Fires of Spring x Lc. Fire Island) has strong upright stems carrying 5-9 red flowers with darker

red lips. It has proven to be an excellent parent, with dominance for color, strong stems and bloom period. Same exact cross is SVO 7097 (apparently I really wanted to make this) also the reciprocal is available as: SVO 7115

3" pots \$14

SVO 7003

C. NEW HYBRID

(C. Chocolate Drop 'SVO' AM/AOS 935 x C. Orchidglade 'SVO' HCC/AOS 1689)

Chocolate Drop (C. guttata (leopoldii) x C. aurantiaca) has many beautiful-arranged waxy red flowers on a strong stem. Orchidglade (C. walkeriana x C. aurantiaca) is a lovely hybrid, producing clusters of orange flowers with yellow lips. Some of its offspring are very nice, and I discovered that Orchidglade is recessive for color, allowing most of the color from the other parent to come through. This is going to produce large clusters of waxy red to orange flowers supported well above the foliage and is going to be a very showy hybrid! The reciprocal cross is also available; see SVO 6956.

3" pots \$14

SVO 7005

(Blc. Love Sound 'Dogashima' AM/AOS 4061 x Slc. Life's Melody 'SVO'2310)

You can't say enough good things about the breeding qualities of Love Sound (L. briegeri x Blc. Bouton D'Or) it has proven its self over and over as a valuable breeder, it is dominant for yellow flower color, form, stem and plant habit. Life's Melody (Slc. Circle of Life x Lc. Magic Melody) is a surprisingly nice hybrid with excellent flower shape on good sturdy stems. The flowered colors ranged from yellow with red flared and red lip to a rose/lavender with purple fares and a purple-red lip. By breeding it to Love Sound will warm up the flower color making for more yellow and orange "sunset" tones with the red flares and maintain the existing good qualities of each parent.

3" pots \$15

SVO 7006

Blc. Kaboom

(Blc. Schroeder's Love 'SVO' AM/AOS 1274x Blc. Guess What 'SVO' AM/AOS1130)

Schroeder's Love (C. schroderae x Love Sound) lends its great flower form, size and strong stem to this grex. Guess What (Waikiki Gold x Lc. Trick or Treat) adds its high flower count of 9-11 bright orange blooms on a strong stem. The great color and presentation of the flowers like an explosion of flowers inspired the name "Kaboom!" but a better name might have been Ka-bloom. These are really nice and are not to be overlooked! >>[Picture](#)<< 3072

3" pots \$14

SVO 7007

Lc. Tropical Trick

(Lc. Trick or Treat 'SVO' 4n 2985 x Lc. Tropical Sunset 'Oceans Heaven'378)

Every spring I enjoy seeing Lc. Trick or Treat and its hybrids bloom, with their large heads of starry, brightly-colored flowers. Tropical Sunset (C. Horace x Tropic Glow) has large orange flowers with full, dark red lips, well presented on a strong

inflorescence. Simply put, this is an excellent hybrid! Trick or Treat (L. Icarus x Lc. Chit Chat) produces amazing heads of 15 or more starry orange flowers it will assure high flower count. These good growing plants will flower with 7-11 orange flowers with red lips...very attractive color combination. These will be super hybrids, with lots of brightly colored flowers for February and March
3" pots \$14

SVO 7008

Eplc. Magic Wand

(Lc. Trick or Treat 'SVO' 4n 2985x Epc. Kyoguchi 'Peter's Pick'3731)

This is a great hybrid, the robust plant grows and bloom well in any condition, the yellow to gold flowers have red stripped lips, and the inflorescences are branched with many 1.25" blooms, but best of all are the fragrant.... yes, fragrant flowers! This is a great non-traditional hybrid! Flower color ranges from yellow to orange with red striped lips. The plants are super easy to grow. Did I mention, FRAGRANT?! Yes - they are! This is a fun cross with a very different look. The plants are great growers, and many will flower this spring. Here is one from last year with 2 branched stems holding 62 flowers and 25 buds! [Picture 3709](#) Same as SVO 7025

3" pots \$14

SVO 7014

Lc. Cherokee Star

(Lc. Trick or Treat 'Orange Magic' AM/AOS 3418 x L. anceps 'White Wonder' 3730)

Long arching stems with 7-9 orange bloom favoring the look of L. anceps is the goal here. These will make excellent outdoor grower in frost free areas, great for basket or even mounted. Excellent growth habit and vigor.

3" pots \$14

SVO 7015

(Pot. Velvet Rubies 'SVO' 2961 x Pot. Star Fire 'Xmas Red' 3982)

We have been working a long time toward this cross; it is breeding for 3 to 4 shapely dark red flowers that are well presented on sturdy stems. Velvet Rubies (Pot. Rubescence x Slc. Tangerine Jewel) has just amazing red color and great flower form. Star Fire (Lc. Trick or Treat x Pot. Rubescence) has the red color and a good stem with 7 flowers. By having Rubescence on as ancestors on both sides will help assure the red color and full flower shape and the Trick or Treat will strengthen the stem and increase flower count.

3" pots \$15

SVO 7016

(Pot. Loud Nine 'Hot Heart' 2541 x Pot. Rubescent Fire 'SVO Fire Bomb' 2520)

This is also a hybrid we have been working towards for some time where the objective is well supported stems of 4-5 well formed flowers in deep red. Loud Nine (Pot. Rubescence x Sc. Orpetii) has excellent red color and shape. Rubescent Fire (Lc. Spring Fires x Por. Rubescence) was a good step in this breeding direction, flowers had good form, the desired color and a stem that supported them well. This cross will assure dark

red flower color and improve flower form, we are still hoping to see flower count of 3-4 blooms and see good stems.

3" pots \$15

SVO 7017

Pot. Lovely Fantasy

(Slc. Fire Fantasy 'Royalty' 2447x Blc. Love Sound 'Dogashima' AM/AOS4061)

Fire Fantasy is a reliable breeding plant; it is dominant for delivering colorful flares and compact growth habit to its offspring. Love Sound is just a reliable but for shape, color, and growth habit. These are really going to be nice; the predominantly yellow flowers will have wide petals with red picotee on the margins. They will be displayed 3-4 on sturdy stems above the foliage. These flowers will be warm and colorful colors a cheery hybrid.

3" pots \$14

SVO 7018

(Pot. Star Fire 'Xmas Red' 2336x Pot. My Precious 'Valentine Gift'1877)

Star Fire (Lc. Trick or Treat x Pot. Rubescence) has the excellent red color and a good stem with 7 flowers; it is proving to be a good parent. My Precious (Blc. Oconee x Slc. Precious Katie) is a well formed, deep red flower with darker burgundy, the plants are compact and produce 3 well held flowers per stem. Blc. Oconee is found in each of the parents used here; this will assure deep red color and the burgundy lip. The flowers will have full shapes and the 3 to 4 blooms will be well presented on sturdy stems.

3" pots \$14

SVO 7020

(Blc. Laughing Boy 'Remake' 3081x Slc. Angel Treat 'SVO Flares'2757)

Big heads of yellow flowers with red flared petals are always a show stoppers. Laughing Boy (Blc. Dennis Olivas x Blc. Love Sound) has this great color combination and Angels Treat (Slc. Angel Eyes x Lc. Trick or Treat) the yellow/orange flower have more of a red picotee on the petals. Both plants have 7-9 flowers well presented on strong stems above the foliage. This color combination of yellow flowers and red flared displayed above the foliage is something special. This is a new advancement for SVO in this breeding class.

We are looking forward to seeing this very eye-catching bloom. Very Limited

3" pots \$16

SVO 7021

(Pot. Golden Circle 'OPRL' 2296 x Blc. Love Sound 'Dogashima' AM/AOS4061)

Golden Circle (Blc. Goldenzelle x Slc. Circle of Life) has superb form with 3.5" orange flowers and red lips on a 6" tall plant that blooms twice a year. Love Sound needs little introduction, as it is described a number of times throughout this listing. This cross will produce well-formed flowers, presented nicely on upright stems; the flowers will be yellow to orange/yellow with red lip. This have a compact plant habit, an ease of growth and blooming make this a highly desirable cross.

3" pots \$14

SVO 7022

(Slc. Tokyo Life 'Dec. 1st.' 1110 x Pot. Telling Lies 'SVO'2965)

Tokyo Life is made by crossing (Lc. Tokyo Magic x Slc. Circle of Life) this pairing has been successful on several levels with plant producing, a variety of great flower colors with excellent shape on compact plants. Telling Lies (Pot. Rubescence x Pot. Love Passion) has orange flowers suffused red with a diamond dust sparkling texture, the flowers have good shape and strong stems. These are going to be robust growing plant with a compact habit. The sturdy stems will hold 4-7 well formed flowers in a range of sunset colors. This is hybrid is a significant one as we have been working towards this type of breeding for some time, with this cross we will get to see the results, these will be well formed flowers, on strong stems with high flower count. Reciprocal crosses offer the opportunity to evaluate the difference in influence that the pod vs. pollen parent have over the offspring. If you have ever wondered about this here is a great opportunity to see for yourself. The reciprocal is: SVO 7023.

SVO 7024

(Epc. Kyoguchi 'Peters Pick' 3731x Blc. Love Sound 'Dogashima' AM/AOS4061)

What a novelty hybrid this is! One parent, Kyoguchi (Enc. aromatica x Gur. aurantiaca) has yellow flowers on branched inflorescences that are highly fragrant and Love Sound has proven its self over and over as a valuable breeder, it is dominant for yellow flower color, form, stem and plant habit. Vigorous plants have resulted and they should start to flower in 3" pots and mature in 4" pots. These will be well formed yellow flowers with red striped lips; some will exhibit the fragrance and branching habits from the Kyoguchi. I am eagerly waiting for the blooming of this cross.

3" pots \$15

SVO 7025

Eplc. Magic Wand

(Lc. Trick or Treat 'SVO' 4n 2985x Epc. Kyoguchi 'Peter's Pick'3731)

This is a great hybrid, these robust plant grow and bloom well in any condition, the yellow to gold flowers have red stripped lips, and the inflorescences are branched with many 1.25" blooms, but best of all are the fragrant.... Picture 3709 Same as SVO 7008

3" pots \$14

SVO 7030

(Blc. Hawaiian Discovery 'Fluorescent Orange' HCC/AOS 1775 x L. Seagulls 'SVO'1172)

Hawaiian Discovery (Blc. Orange Nugget x Blc. Bouton D'Or) is robust growing plant with amazing color as the cultivar name indicates 'Fluorescent Orange'. Seagulls (L. briegei x L. milleri) is a small compact plant with upright stems of 7-9 orange red flowers. The offspring will resemble the plant habits of Blc. Love Sound and Lc. Tokyo Magic. The flowers will favor the orange tones, with 5-7 blooms on sturdy stems. 4" pots \$14

SVO 7033

(Pot. Al Thanhauser 'The Best One' 1465x Pot. Choco Berry Fondue 'Red Spices') This is a different style of red breeding, here we have taken the more traditional looking flowers of 'The Best One' and combined them with the novelty waxy red flowers of 'Red Spices'. Al Tanhauser (Pot. Rubescence x C. Orchidglade) is a particularly fine red flower, it has excellent shape and the 4 to 5 blooms are reliably produced on strong inflorescences twice a year. Chocoberry Fondue (C. Chocolate Drop x Pot. Ryo Iwata) flowers with up to 7 blooms in deep saturated bright red colors, this combined with the waxy substance and strong spicy fragrance makes this very memorable. The expectation is for several significant improvements: strong stem holding 5-7 flowers above the foliage, heavy substance and waxy texture, deep red color with deep burgundy lips, spicy fragrance and some progeny will flower twice a year. The plants will be large compact types maturing at 8-10" tall. 3" pots \$15

SVO 7035

Pot. Showcase

(Slc. Angel's Fantasy 'Solar Flare' FCC/AOS 1870 x Blc. Love Sound 'Dogashima' AM/AOS4061)

Angel's Fantasy is particularly nice, the flowers are just spectacular, and the FCC/AOS award says a lot about the flower quality. This plant is also a good grower and flowers twice a year. There are many good things about the breeding qualities of Love Sound (L. briegei x Blc. Bouton D'Or) it has proven its self over and over as a valuable breeder, it is dominant for yellow flower color, form, stem and plant habit. These are really going to be great, expect mostly yellow flowers with wide petals and red flares, 3 to 5 flowers will be displayed on sturdy stems above the foliage. Check out the first to bloom [Picture 2690](#) [Picture 4063](#) I am pleased we have this available again, it a 'Showcase' of flowers!. 3" pots \$15

SVO 7040

(Slc. Lisye Sentiasa 'SVO' 1300x Slc. Durban Rose 'SVO'4235)

The parents of Lisye Sentiasa are (Lc. Mini Purple x Slc. Angel Jack) the flowers are shades of deep vibrant purple, very eye catching, the small plants flower twice a year with 2 flowers per inflorescence. Durban Rose (Lc. Jose Dias Castro x Slc. Circle of Life) is a new hybrid that sold out quickly in 2016; the flowers are an attractive uniform pink-lavender with exceptionally wide petals complemented by a nice lip. This cross is a new

direction of breeding for SVO; we are breeding for large flowers with exceptionally wide petals in colors of dark vibrant purples. The plants need to mature less than 8" tall and flower 2x a year. This pairing has the potential to achieve the expectation. This cross is also available as a reciprocal SVO 7061. Reciprocal crosses offer the rare opportunity to evaluate the difference in influence that the pod vs. pollen parent have over the offspring. If you have ever wondered about this here is a great opportunity to see for yourself.

3" pots \$15

SVO 7041

(Blc. Picotee Passion 'Amazing' 6064 x Lc. Tokyo Magic '6-1' AM/AOS835)

The late Frank Fordyce made the hybrid of (Blc. Horizon Flight x L. anceps) he allowed me to register it as I received the first AOS award I chose the name Picotee

Passion... 'Amazing' is not awarded but should be, it has the most amazing flower color

check out this [Picture 9064](#) the 5-6 flowers are rather large and well displayed on an L.

anceps like inflorescence that is about 12" long. Tokyo Magic (Lc. Irene Finney x L.

briegeri) is a proven breeder that has given rise to many exceptional hybrids; it imparts

good flower shape, red lip color, sturdy stems and a compact upright plant habit. I'm

looking forward to seeing the 5-7 full-shaped flowers being held high on strong stems

from this cross. Flower color is anticipated to be in shades of lavender and yellow many

will have petals exhibiting a red or lavender picotee. Very robust growing plants, this is a

super cool new novelty breeding.

3" pots \$15

SVO 7050

Lc. Dago Red

(L. milleri 'Dr. Koopowitz Red' HCC/AOS 594x C. violacea 'Muse' FCC/AOS)

I saw one of these flowering at the Redland International Orchid Festival in Florida a

very eye catching cross. The starry shaped flowers has an amazing burnt orange color,

overlaid with fuchsia, the lip was a royal purple with a bright yellow throat and the

flowers just sparkled in the sunlight. As with any hybrid using the best parents possible is

always important. So when this milleri and violacea bloom I knew it was time to remake

the cross. Very limited

3" pots \$25

SVO 7053

(Pot. Love Passion 'Island Romance' 1418 x Lc. Tropical Sunset 'Oceans Heaven'1192)

The cultivar 'Island Romance' has a higher flower count than most of the Love Passion

whose parents are (Lc. Trick or Treat x Slc. William Farrell) it blooms with 7 to 11 well-

displayed orange flowers. Tropical Sunset (C. Horace x Lc. Tropic Glow) has large

shapely orange flowers with a bold red lip. The expectation here is for large orange

flowers with contrasting red lips, the blooms will be well held and beautifully displayed

above the foliage. These will be impressive display plants for this spring shows.

3" pots \$14

SVO 7055

Pot. Telling Lies

(Pot. Love Passion 'Island Romance' 1418x Pot. Rubescence 'SVO' AM/AOS4)

This cross named Telling Lies has proven to produce beautiful orange flowers suffused red covered with a diamond dust sparkling texture; the flowers have good shape and strong stems. They are robust growing plant with a compact habit, maturing at 10" tall. We don't often re-made crosses but this was so nice we wanted to make it available again, and on a more selfish note, we wanted to see a larger number of these flower as the first batch sold out quickly. Interesting name to this cross, we are not "telling lies" about its quality! First to bloom >>Picture<< 1855
3" pots \$14

SVO 7056

Orquidacea's Small Fortune

(Slc. Kagaribi Dawn 'Red Star' 1508x Lc. Trick or Treat 'Orange Magic' AM/AOS 3723)

Kagaribi Dawn has a brilliant red flower with a very starry shape influenced by the L. cinnabarina in the back ground of its breeding. It really is a eye catching color and shape, everybody is attracted to the mother plant when it is in flower during February and March. Trick or Treat (L. Icarus x Lc. Chit Chat) produces amazing heads of 15 or more starry orange flowers it will assure high flower count in its offspring. This is all about heads of starry flowers, they will be mostly red but some will have a touch of orange, great stems will hold the flowers high. What a very showy novelty style of hybrid!
3" pots \$14

SVO 7059

(Lc. Spring Fires 'Lenette' #1' 4248x Pot. My Precious 'Valentine Gift' 1877)

Spring Fires (Lc. Fires of Spring x Lc. Fire Island) has strong upright stems carrying 5-9 red flowers with darker red lips. It has proven to be an excellent parent, with dominance for color, strong stems and bloom period. My Precious (Blc. Oconee x Slc. Precious Katie) is a well formed, deep red flower with darker burgundy, the plants are compact and produce 3 well held flowers per stem. Here we are developing those elusive well shape red flowers with good shape on strong stems. These parents possess the potential to deliver the objective.
3" pots \$14

SVO 7060

(Pot. Showcase 'SVO' 4063 x Lc. Tokyo Magic '6-1' AM/AOS835)

Showcase (Slc. Angel's Fantasy x Blc. Love Sound) is a great cross; expect mostly yellow flowers with very wide petals and attractive red flares, the 3 to 5 flowers are well displayed on sturdy stems above the foliage. Tokyo Magic (Lc. Irene Finney x L. briegeri) is a proven breeder that has given rise to many exceptional hybrids; it imparts good flower shape, red lip color, sturdy stems and a compact upright plant habit. This pairing will give well shaped flowers with excellent form, strong stems of 4-5 showy blooms in soft yellows with many having dark red flared. The plants are robust and easy growers and we are expecting to see these start blooming at a young ages in 3" pots.
3" pots \$14

SVO 7061

(Slc. Durban Rose 'SVO' 4235 x Lc. Lisye Sentiasa 'SVO'1300)

3" pots \$15

SVO 7062

(Slc. Tokyo Life 'SVO' HCC/AOS 1827 x Pot. Martha Clarke 'Orange Tart'1522)

Tokyo Life is made by crossing (Lc. Tokyo Magic x Slc. Circle of Life) this pairing has been successful on several levels with plant producing, a variety of great flower colors with excellent shape on compact plants. The grex I named after my wife, yes I consider it that good. Martha Clarke (Blc. Love Sound x Slc. Circle of Life), has been a great overall hybrid. The cultivar 'Orange Tart' is considered my best, with excellent shape, color, nice plant habit, and twice-a-year blooming. When you look at this breeding you see Circle of Life is on both side deeper and looking even deeper you find the Rupicolous L. briergeri on both side as well. This gives an indication of what to expect; the flower color will range from some light pastels to yellows and orange, all will be well formed flowers with wide petals on strong stem holding 3-4 blooms on compact plants.

3" pots \$15

SVO 7063

(Slc. Tokyo Life 'SVO' HCC/AOS 1827 x Lc. Angel Heart 'Hihimanu' AM/AOS 1174)

Here is a test cross, the outcome is a bit hard to predict. Tokyo Life is made by crossing (Lc. Tokyo Magic x Slc. Circle of Life) this pairing has been successful on several levels with plant producing, a variety of great flower colors with excellent shape on compact plants. Angel Heart (Lc. Puppy Love x C. Penny Kuroda) has flowers that are a soft pastel pink with pink flaring; it has strong stems that do a good job presenting the 5-7 large flowers above the foliage. It is a challenge with this prediction; I believe flowers will have good shape, be well held on strong stems. Flower color is a bit harder to nail down. The could be very soft pasted pinks or darker rose, even some yellow shades or reds can come from this, but also unusual flaring will be present in many of the flowers... I guess I should say 'widely variable flower color' with the cross.

3" pots \$14

SVO 7064

Pot. Island Girl

(Blc. Goldenzelle 'Lemon Chiffon' AM/AOS 1328 x Pot. Little Toshie 'Gold Country' AM/AOS1095)

I have wanted to make the cross for some time but the pods have not held on Goldenzelle long enough to have viable seed. So tenacity has paid off and we finally got a good pod and viable seed. Goldenzelle (Blc. Fortune x C. Horace) is a standard sized plant the bulbs are 18" tall and it takes a 7-8" pot to fully mature a plant. The flowers are large over 6" across they are well held on strong stems in groups of 3 and 4. The cultivar 'Lemon Chiffon' is yellow it has excellent shape, with wide petals, the lips is also yellow with a bright red spot. For years this Goldenzelle has been considered one of the top standard yellow Cattleyas ever produced. Little Toshie (Blc. Toshie Aoki x Sc. Beaufort)

is a remarkable hybrid it flowers 2-3 times a year, every flowering produced excellent quality bright yellow flowers with red lips, the plants are only 6" tall and have a nice tidy plant habit. It is an excellent breeding plant that imparts flower color, and shape. This cross will give us well sized flowers that are 4-5" across, the petals will be wide and lips red, and plants will mature at 8-10" tall. The flowers will be mostly yellow but some will have a blush of red over them. I am very optimistic about the potential here.

3" pots \$16

SVO 7083

(Blc. Guess What 'SVO' AM/AOS 1130 x L. Seagulls 'Red' 844)

Guess What (Blc. Waikiki Gold x Lc. Trick or Treat) blooms with 7-8 vibrant yellow-orange flowers held high on a strong stem'. Seagulls (L. briegeri x L. milleri) is a small compact plant with upright stems of 7-9 orange red flowers. The offspring will have very compact plants habit, the flowers will mostly favor the orange/red colors, with 5-7 blooms on sturdy stems.

4" pots \$14

SVO 7084

(Pot. Burana Fire 'SVO' HCC/AOS 1844 x Lc. Tropical Aurora 'SVO')

I really like bold colored flowers with exotic flaring Burana Fire (Pot. Burana Beauty x Slc. Fire Fantasy) had outrageous color the blooms are mostly yellow with red picotees and overlays, the stems hold 4-5 flowers above the foliage. I think Tropical Aurora is a special plant with considerable potential; the parents are (Lc. Aussie Sunset x Lc. Tokyo Magic). The flowers are a pure very bright yellow in fact the most intense yellow imaginable, the lips are a contrasting red. It is interesting that the red flaring of Aussie Sunset is not expressed in Tropical Sunset, but it is obviously its genes are in there. I believe these will bloom with excellent red flares on yellow flowers; the strong stems will do a good job displaying the 5-7 flowers. The plant will have a robust and compact in its growing habit. This cross is also available as a reciprocal SVO 7087. Reciprocal crosses offer the rare opportunity to evaluate the difference in influence that the pod vs. pollen parent have over the offspring. If you have ever wondered about this here is a great opportunity to see for yourself.

3" pots \$14

SVO 7085

(Pot. Lovely Martha 'SVO' 1774x Pot. Martha Clarke 'Amazing' 714)

For year's "line breeding", a process where related plants which have been selected for common desired characteristics are crosses together, has proven is an effective way to accentuate the good qualities a breeding line. The flowers of Lovely Martha (Blc. Fuchs Orange Nugget x Pot. Martha Clarke) have a sparkling diamond dust texture; they are a light orange color with a touch of red on the petal and sepal tips, making for a very attractive flower. Martha Clarke (Slc. Circle of Life x L. briegeri) blooms with excellent shape, orange color, good plant habit, and twice-a-year blooming; this cultivar named 'Amazing' has excellent red flaring on the petals. Here we are expecting the red flaring from the patents to be expressed on the petals of the offspring, we also hope to see that diamond dust sparkle. There will be 4-6 flowers well presented on sturdy stems from compact growing plants. 3" pots \$14

SVO 7086

Slc. Granata Sunrise

(Lc. Tokyo Magic '6-1' AM/AOS 835x Slc. Wasp Nest 'Red Red' HCC/AOS 157)

Tokyo Magic (Lc. Irene Finney x L. briegeri) is a proven breeder it has given rise to many exceptional hybrids; it imparts good flower shape, red lip color, sturdy stems and a compact upright plant habit. Wasp Nest (Slc. Tangerine Jewel x Lc. Trick or Treat) has 8-10 solid red flowers on long stems and compact plants. This cross is made every few years as it is a successful in producing good quality flowers that range in sunset colors; they are presented on great stems and is always an excellent seller at orchid shows
3" pots \$14

SVO 7087

(Lc. Tropical Aurora 'SVO' x Blc. Burana Fire 'SVO' HCC/AOS 1844)

The description and reciprocal is: SVO 7084

3" pots \$14

SVO 7088

(Lc. Tropical Aurora 'SVO' x Slc. Wasp Nest 'Red Red' HCC/AOS 157)

I think Tropical Aurora is a special plant with considerable potential; the parents are (Lc. Aussie Sunset x Lc. Tokyo Magic). The flowers are a pure very bright yellow in fact the most intense yellow imaginable, the lips are a contrasting red. Wasp Nest (Slc. Tangerine Jewel x Lc. Trick or Treat) has 8-10 solid red flowers. This cross resembles an earlier cross named Slc. Granata Sunrise (Lc. Tokyo Magic x Wasp Nest) it was successful in producing many good quality flowers on great stems. By using Tropical Aurora I expect improved flower color in bright sunset shades.

3" pots \$14

SVO 7089

(Pot. Fordyce Prelude 'Pinnacle' AM/AOS 2972x Lc. Tropical Aurora 'SVO')

Fordyce Prelude (Slc. California Apricot x Blc. Horizon Flight) is a bright yellow flower with bold red flares on the petals; it is a small grower and blooms twice a year. Tropical Aurora is a special plant with considerable potential; the parents are (Lc. Aussie Sunset x Lc. Tokyo Magic). The flowers are a pure very bright yellow, the most intense yellow imaginable; the lips are a contrasting red. It is interesting that the red flaring of Aussie Sunset is not expressed in Tropical Sunset, but obviously its genes are there. These should be bright yellows with dark red flairs; flower will exhibit wide petals and good form and the stems will do good job displaying the 4-7 flowers above the foliage.

3" pots \$14

SVO 7093

Blc. Topaz Impact

(Lc. Mildred Rives 'Orchidglade' FCC/AOS 2992x Blc. Love Sound 'Dogashima' AM/AOS 4061)

Semi-alba cattleyas are a sight to behold the pure white flowers and contracting red lips are just, beautiful. Mildred Rives is a famous semi-alba with huge flowers of excellent

shape on large standard sized plants. Love Sound it has proven its self many times as a valuable breeder, it is dominant for flowers shape, stem and compact plant habit. This [Picture 4065](#) is a great example of what the offspring will look like; it is one of the first to bloom. These plants flower well in 4" pots with excellent flower presentations on compact plants.

4" pots \$15

SVO 7094

Pot. Star Fire

(Lc. Trick or Treat 'Orange Magic' AM/AOS [2984](#) x Pot. Rubescence 'SVO' AM/AOS [4](#))

This cross has been very nice; the flowers are shades of dark red colors, the compact growing plants produce strong inflorescences that do a good job holding the 4-5 blooms above the foliage. Just check out nice this cross is, look these: [Picture 4328](#) [Picture 2566](#)

3" pots \$14

SVO 7095

(Pot. Martha Clarke 'Amazing' [714](#) x Lc. Tropical Aurora 'SVO')

My wife's name sake Martha Clarke, whose parents are (Blc. Love Sound x Slc. Circle of Life) has been a successful hybrid with many plants producing great flower colors with excellent shape on compact plants. Tropical Aurora is a special plant; its parents are (Lc. Aussie Sunset x Lc. Tokyo Magic). The flowers are a pure very bright yellow in fact the most intense yellow imaginable, the lips are a contrasting red. These will be well shaped flowers held high; their color will be variable wide range in sunset shades. Everyone will be interesting.

3" pots \$14

SVO 7097

Pot. Spring Prominence

(Pot. Hawaiian Prominence 'America' AM/AOS [1848](#) x Lc. Spring Fires 'Lenette #1' [4248](#))

One of our long term breeding goals is the development strong stems holding heads of well shaped reds. This cross incorporates parents with the key traits towards this development. The intense purple-red color and bright yellow throat of Hawaiian Prominence (Hisako Akatsuka x Slc. Wendy's Redstone) commands attention, its well-shaped flowers are also displayed nicely on good strong stems. Spring Fires (Lc. Fires of Spring x Lc. Fire Island) has strong upright stems carrying 5-9 red flowers with darker red lips. It has proven to be an excellent parent, with dominance for color, strong stems and bloom period. Same exact cross is SVO 7001 (apparently I really wanted to make this, so I made it twice!) also the reciprocal is available as: SVO 7115

3" pots \$14

SVO 7098

(Lc. Tokyo Magic '6-1' AM/AOS [835](#) x Pot. Martha Clarke 'Amazing' [714](#))

Tokyo Magic (Lc. Irene Finney x L. briegeri) is a proven breeder that has given rise to many exceptional hybrids; it imparts good flower shape, red lip color, sturdy stems and a compact upright plant habit. Martha Clarke is my wife's name sake; the parents are (Blc.

Love Sound x Slc. Circle of Life) it has been a successful hybrid with many plants producing great flower colors with excellent shape on compact plants. I find this type breeding very intriguing it has all the makings for well displayed attractive flowers of excellent shape in a range of yellows all with red lips and some will have petals tipped in red.

3" pots \$14

SVO 7099

(Lc. Tropical Sunset 'Oceans Heaven' 1192 x Lc. Tokyo Magic '6-1' AM/AOS835)
Here is one to consider. Tropical Sunset (C. Horace x Tropic Glow) has large orange flowers with full, dark red lips, well presented on a strong inflorescence. Simply put, this is an excellent hybrid! Tokyo Magic (Lc. Irene Finney x L. briegeri) is a proven breeder that has given rise to many exceptional hybrids; it imparts good flower shape, red lip color, sturdy stems and a compact upright plant habit. This is a very promising cross for big orange flowers with bright red contrasting lips; the blooms will be held high and well presented and the plants will be compact. There are a lot of good qualities coming together here.

3" pots \$14

SVO 7103

(Blc. Fordyce Fantasy 'SVO Winter Splash' 1131 x Lc. Tokyo Magic '6-1' AM/AOS835)
The late Frank Fordyce developed the hybrid Fordyce Fantasy its parents are (Blc. Horizon Flight x C. aurantiaca) it was a surprisingly nice cross with flowers having orange sepals, yellow petals with red picotees and flairs, the plants are very robust grower as well. Tokyo Magic (Lc. Irene Finney x L. briegeri) is a proven breeder that has given rise to many exceptional hybrids; it imparts good flower shape, red lip color, sturdy stems and a compact upright plant habit. Here we are developing a hybrid with flowers exhibiting good yellow color and many will have red flairs. Strong stems will do a good job displaying the 5-7 flowers above the foliage. The inspiration for this cross came from an earlier hybrid Blc. Fantasy Love they are similar in many regards and were quite nice, it is offered below as SVO 7108. A nice quality with this cross is it will bloom in April making its timing perfect for those later show dates.

3" pots \$15

SVO 7105

(Pot. Golden Circle 'OPRL' 2296 x Lc. Tropical Aurora 'SVO')
Golden Circle (Blc. Goldenzelle x Slc. Circle of Life) 'OPRL' stands for **Orange Petals Red Lip**. It is one of my most reliable breeding plants; it imparts good flower size, shape and color it also flowers two or three times a year. Tropical Aurora is a special plant with considerable potential; the parents are (Lc. Aussie Sunset x Lc. Tokyo Magic). The flowers are a pure very bright yellow, the most intense yellow imaginable; the lips are a contrasting red. How about bright golden orange flowers with bright red lips of excellent shape sound good? This cross should deliver the breeding objective.

3" pots \$14

SVO 7108

Blc. Fantasy Love

(Blc. Fordyce Fantasy 'SVO Winter Splash' 1131 x Blc. Love Sound 'Dogashima' AM/AOS 4061)

I am reminded each spring how beautiful the flowers are of Fantasy Love 'SVO' check out its [Picture 1773](#) I just had to make it available again. Fordyce Fantasy (Blc. Horizon Flight x C. aurantiaca) it was a surprisingly nice cross with flowers having orange sepals, yellow petals with red picotees and flairs, the plants are very robust grower as well. Love Sound it has proven its self many times as a valuable breeder, it is dominant for yellow color, flowers shape, stem and compact plant habit. This cross makes excellent yellow flowers exhibiting petals with light rose/red picotees and blushes.

3" pots \$15

SVO 7111

(Blc. Kaboom 'SVO' 1786x Blc. Guess What 'SVO' AM/AOS 1130)

The parents of Kaboom (Blc. Schroeder's Love x Blc. Guess What) produced an excellent hybrid the strong stems hold 5-7 pure yellow flowers of excellent shape and carriage. This is line breeding as we have chosen to cross Kaboom back to its parent Guess What (Blc. Waikiki gold x Lc. Trick or Treat). One nice quality Guess What has going for it is amazing flower longevity with blooms lasting 8-10 weeks being typical. Here we will see 5-7 golden yellow flowers well displayed with excellent arrangement on strong stems and also we believe flower longevity will be 2 months or longer. Should this be named Blc. Kaboom What...?

3" pots \$14

SVO 7112

(Lc. Spring Fires 'Lenette' #1' 4248x Pot. Star Fire 'Xmas Red' 3982)

Spring Fires (Lc. Fires of Spring x Lc. Fire Island) has strong upright stems carrying 5-9 red flowers with darker red lips. It has proven to be an excellent parent, with dominance for color, strong stems and bloom period. Star Fire (Lc. Trick or Treat x Pot.

Rubescence) has the excellent red color and a good stem that carries 7 flowers. I am very optimistic about this as it has great potential for producing amazing heads of reds!

3" pots \$14

SVO 7113

(Slc. Sierra Gem 'SVO Red Fireball' HCC/AOS 1119x Pot. Star Fire 'Xmas Red' 3982)

Here we are breeding for nice stems of 5-7 well formed deep red flowers on a reduced plant size. Sierra Gem (Slc. Hazel Boyd x Sl. Pole-Star) is a small compact growing plant with 5-6, bright red well shaped and presented flowers. Star Fire (Lc. Trick or Treat x Pot. Rubescence) blooms with 7 red flowers on good sturdy stems. The influence of Sierra Gem on this grex will be to hold plant size down to about 7" tall, the Star Fire will assure flower size and flower count. All in all this is a very promising small growing compact-catt that will have a great presentation of 5-7 red flowers.

3" pots \$14

SVO 7115

(Lc. Spring Fires 'Lenette' #1 4248 x Pot. Hawaiian Prominence 'America' AM/AOS1848)

The reciprocal is: SVO 7097 and 7001

3" pots \$14

SVO 7116

(Lc. Spring Fires 'Lenette' #3' 4248x Pot. Anduril 'Krull's Scarlet' AM/AOS)

Spring Fires (Lc. Fires of Spring x Lc. Fire Island) has strong upright stems carrying 5-9 red flowers with darker red lips. It has proven to be an excellent parent, with dominance for color, strong stems and bloom period. The parents of Anduril are (Slc. Jewel Box x Lc. Trick or Treat) it flowers with a nice cluster of red flowers held above the foliage, blooming in April. These are going to be impressive heads of red!

3" pots \$14

SVO 7118

(Pot. Golden Circle 'OPRL' 2296x Slc. Cosmic Delite 'SVO' HCC/AOS481)

Golden Circle (Blc. Goldenzelle x Slc. Circle of Life) 'OPRL' stands for

Orange Petals Red Lip. It is one of my most reliable breeding plants; it imparts good flower size, shape and color it also flowers two or three times a year. Cosmic Delite (Slc. Bright Angel x Sc. Batemanniana) is a mini-catt with amazing flower color - yellow with a bold red overlay of red flaring. The expectation here is for excellent shape, with many having red flaring. There are antastic color possibilities with this mini-catt. Here is a [Picture 2970](#) of the first to bloom, it's super cute.

3" pots \$15

SVO 7119

(Blc. Kaboom 'SVO' 1786x Blc. Love Sound 'Dogashima' AM/AOS4061)

The parents of Kaboom (Blc. Schroeder's Love x Blc. Guess What) produced an excellent hybrid the strong stems hold 5-7 pure yellow flowers of excellent shape and carriage.

This is line breeding as we have chosen to cross Kaboom back to Love Sound it is one of the parents in Schroder's Love (Blc. Love Sound x C. schroderiae). A great quality of Schroder's Love is the large flower size and pastel flower colors. Here we will see 5-7 pastel yellow to pink flowers they will be well displayed on strong stems; this is a not so easy type of flower color to achieve. Maybe we will name this cross: Blc. Kaboom Sound.

3" pots \$14

SVO 7123

(Pot. My Precious 'Valentine Gift' 1877x Pot. Paradise Rose 'My Valentine'2730)

My Precious (Blc. Oconee x Slc. Precious Katie) is a well formed, deep red flower with darker burgundy, the plants are compact and produce 3 well held flowers per stem.

Paradise Rose (Slc. Pink Doll x Blc. Toshie Aoki) has intense color and shows an interesting phenomenon of color dominance. The flowers of Blc. Toshie Aoki show the influence from *C. dowiana*, with bright yellow flowers and red lips, like *C. dowiana* the

flowers of Toshie Aoki are recessive for color but intensify purple colors Pink Doll has dark purple flowers, the hybrid Paradise Rose combines these traits and produces intense crimson-red-purple flowers. Both of these are small compact growers, the plant will mature at 6-7" tall and have 4" intense red flowers with burgundy red lips. They should flower 2x a year and start blooming in 3" pots.

3" pots \$16

SVO 7126

(Lc. Tropical Rainbow 'Montclair' 3303x Pot. Spring Prominence 'Fire Star'2989)
Tropical Rainbow (Lc. Commander x Lc. Tropic Glow) can flower with 9 blooms, the flowers are held high and have a red/rose color, and the lip has a nice bright yellow area centrally. Spring Prominence (Pot. Hawaiian Prominence x Lc. Spring Fires) has 4-6 large velvety starry bright red flowers held high on good stems. This cross is about red color, high flower count and great presentation.

3" pots \$14

SVO 7140

(Lc. Angel Heart 'Hihimanu' AM/AOS 1174x Pot. Martha Clarke 'Amazing'714)
This is a test cross and the outcome is a harder to predict. Angel Heart (Lc. Puppy Love x C. Penny Kuroda) has flowers that are a soft pastel pink with pink flaring; it has strong stems that do a good job presenting the 5-7 large flowers above the foliage. Martha Clarke's parents are (Blc. Love Sound x Slc. Circle of Life) this pairing has been successful with plant producing great flower colors with excellent shape on compact plants. I believe flowers will have good shape and be well held on strong stems. Flower color is going to be widely variable ranging from soft pasted pinks or darker rose, even some yellow shades or reds can come from this, but also unusual flaring will be present in many of the flowers. It will be fun to see how these turn out.

3" pots \$14

SVO 7152

Lc. Jalapa (aka. Florence Lin)

(C. leopoldii 'SVO Prince' 4n 4096x L. milleri 'Dr. Koopowitz Red' HCC/AOS594)
The first time we made Jalapa it was with a 2n leopoldii that blooms with 52 flowers the offspring did receive several awards as they were very floriferous many had 15-19 flowers per stem. The second time we made it, we used these parents listed and what difference that make in flower color, size and shape, they sold out quickly. Here we have made the exact re-make again. These are really good he flowers are deep red with even darker burgundy spots, and have excellent shape. This is a very desirable primary hybrid, it is a must have.

3" pots \$20

SVO 7154

Lc. Shirayukihime

(Lc. Mildred Rives 'Orchidglade' FCC/AOS 2992x Lc. Tokyo Magic 'Hihimanu' 371)
Semi-alba cattleyas are a beautiful color combination. Mildred Rives is a famous semi-alba with huge flowers of excellent shape on large standard sized plants. Tokyo Magic

has been proven a valuable breeder, it is dominant for flowers shape, stem and compact plant habit, and allows the semi-alba colors to come through. These plants will flower well in 4" pots with excellent flower presentations on compact plants and of course in the semi-alba color. Just an excellent semi-alba compact cattleya cross.

3" pots \$15

SVO 7165

(C. Little Dipper 'Sato' 4103 x Lc. Tropical Aurora 'SVO')

Little Dipper has sired a number of great hybrids like: Sacramento Splash, Dream Cloud, Nora's Melody, Garret Collins and many others, it imparts flared petals that are wide and flat. Tropical Aurora has considerable potential; the parents are (Lc. Aussie Sunset x Lc. Tokyo Magic). The flowers are a pure very bright yellow, the most intense yellow imaginable; the lips are a contrasting red and 5-7 flowers are produced on strong up right stems. The all the flowers will have great shape and be displayed on good stems. The flower color and flare color will be variable making each plant unique, we expect colors to range from yellow to cream and some may even be lavender. A potpourri of colors!

3" pots \$15

SVO 7177

Pot. Clinton Lewis

(Pot. Fordyce Prelude 'Pinnacle' AM/AOS 2972x Bc. Love Sound 'Dogashima' AM/AOS4061)

Fordyce Prelude (Slc. California Apricot x Bc. Horizon Flight) is a bright yellow flower with bold red flares on the petals; it is a small grower and blooms twice a year. Love Sound (L. briegeri x Bc. Bouton D'Or) is a proven breeding plant with many excellent offspring, it is dominant for yellow flower color, form, stem and plant habit. These will be bright yellows with dark red flairs; flower will exhibit wide petals and good form and the stems will do good job displaying the 4-7 flowers above the foliage. Very Limited

3" pots \$15

SVO 7216

(Dialc. Ann's Snowflake 'SVO' 2612 x Lc. Hsinying Skies ' Ching Hua')

Years ago I made many Diacrium, now known as 'Caularthron' based hybrids; they were easy growers, produced great stems of white to pink flowers that bloom for April and May. Ann's Snowflake (Dial. Snowflake x Lc. Ann Akagi) is possibly the best of this breeding line; the inflorescence is reminiscent of a Phalaenopsis in that the long arching stems hold 12-15 well spaced and well arranged light pink flowers. Hsinying Skies (L. Puppy Love x Lc. Sierra Skies) has beautiful soft pink flowers of excellent shape, substance and presentation. This is a highly advanced Diacrium hybrid; the flowers will be soft pink, well shaped and beautifully presented on arching inflorescences additionally they will have 6-8 week flower longevity. Just simply an excellent paring.

3" pots \$15

SVO 7237

(Pot. Burana Angel 'SVO #1 Best' HCC/AOS 478 x C. Chocolate Drop 'SVO' AM/AOS 935)

Flaring in cattleyas can be quite unusual, in the case of Burana Angel (Pot. Burana Beauty x Slc. Bright Angel) we have an unusual color combination the red flowers have red flares and the red lip has a bright yellow center. By crossing it with the waxy red flowers of Chocolate Drop will make this quite the novelty hybrid. The outcome is a bit difficult to predict so there is some speculation on my part. The flowers will be a bit starchy but fuller than Chocolate Drop, the color will be red but the texture could be from waxy to matte, the red lips may or may not have a yellow center, and flower count will be 7 or more. That's pretty close but only time will tell.

3" pots \$15

SVO 7288

Lc. Miss Wonderful

(Lc. Mari's Song 'CTM 217' HCC/AOS 2995 x L. anceps f. petaloid 'Jody' 3588)

Miss Wonderful has been a fantastic hybrid we have made it on 4-5 separate occasions in several variants and every time they are excellent! They are strong growing plants, easy to bloom, with large flowers and excellent flairs on 12 to 18" long inflorescences. This is a particularly intriguing cross. The use of the L. anceps forma petaloid is expected to increase petal width and modify lip shape in ways not seen before. This has potential to produce truly unique Miss Wonderful offspring the best of these will be unbelievable. I have tried to remake it now on 2 occasions with no luck; don't miss out on this one.

3" pots \$25

SVO 7292

Dialc. Mizoguchi 'SVO' AM/AOS 101 x L. anceps 'White Marble' 353)

Mizoguchi (Dial. Snowflake x L. anceps) has long anceps like stems with 10 well spaced and arranged light pink flowers. By crossing it back to anceps 'White Marble' will increase flower size make for mostly white flowers with dark veins in the throat of the lip. The flowers will be well held on arching but the quantity will be reduced to 5-7. This is going to look like a high flower count L. anceps with a tidier and more compact plant.

3" pots \$14

SVO 7323

(Pot. Mari's Vision 'SVO' 2763 x Pot. Angel's Fantasy 'Solar Flair' FCC/AOS 1870)

Crazy nice flares on Mari's Vision (Blc. Mari's Song x Slc. Fire Fantasy) check out the picture as it is hard to describe! This plant blooms 2x a year and is a compact grower, Angel's Fantasy has flared flowers are just spectacular, the FCC/AOS award says a lot about the flower qualities, it is also a good grower and flowers twice a year. What a good match up for amazing flaring on compact plant that will flower twice a year.

3" pots \$15

SVO 7358

(Epc. Kyoguchi 'Peter's Pick' 3731 x Lc. Florence Lin 'Diamond Orchids' AM/AOS 3694)

This is a great novelty; Kyoguchi (Enc. aromatica x Gur. aurantiaca) has many yellow flowers on branched inflorescences that are highly fragrant. Florence Lin (C. tigrina x L. milleri) has dark red flowers and a crimson-red lip; it can hold as many as 19 flowers on a single stem! These will have many red to orange flowers, it is hard to predict fragrance but I expect there to be a notable amount. There are easy to grow and bloom, and should make nice specimen plants.

3" pots \$14

SVO 7369

Lc. Millie Perner

(L. anceps f. coerulea 'Elizabeth Eyes' AM/AOS 1602x Lc. Love Knot f. coerulea 'SVO' HCC/AOS)

Considered to be one of the better forma coerulea L. anceps 'Elizabeth Eye's' has excellent color, form and is an robust grower. Love Knot (C. walkeriana x L. sincorana) has flat flowers, great color, blooms 2x a year, and all this from a plant 6" tall! These will be flower with 3-4, flat, coerulea flowers on 12-16" long stems; making for lots of charm from the L. anceps, shape from the Love Knot and color from both.

3" pots \$15

SVO 7376

(Blc. Guess What 'SVO' AM/AOS 1130x Slc. Angel Fantasy 'Solar Flare' FCC/AOS 1870)

Guess What (Blc. Waikiki Gold x Lc. Trick or Treat) blooms with long lasting 7-8 vibrant yellow-orange flowers held high on a strong stem. Angel's Fantasy is particularly nice, the flared flowers are just spectacular, and the FCC/AOS award says a lot about the flower quality it also flowers twice a year. There is a good opportunity here for 5-6, well supported yellow flowers with red flares. I can't wait for these to start flowering!

3" pots \$14

Standard Cattleyas

SVO 5589

Smbc. NEW HYBRID

(Lc. Issy SVO' HCC/AOS 1834 x Schom. schultzei 'Old Sherry' 2700)

There is no question about it: these will be large, robust plants. Issy (L. tenebrosa x C. leopoldii) stands 28" tall, producing 5-7 huge 7" bronze flowers with red lips on very

strong stems. Schom. schultzei 'Old Sherry' is 20" tall with a 4' long inflorescence carrying 15-20 dark waxy wine red flowers. If you have the space for these, they are going to be crazy-magnificent in flower! Mature plants will have strong stems with extra large deep burgundy red flowers and bright red lips. These will be great outdoor growers in frost-free areas or up high in the greenhouse with plenty of light. Very Limited
3" pots \$18

SVO 6945

Pot. Mem. Mario Lanza

(C. Chocolate Drop 'SVO' AM/AOS 935 x Pot. Carolina Splendor 'Aztec II' AM/AOS4301)

This type of breeding gives excellent results, as evidenced by multiple awards to the original grex made by Ken Griffith at Lenette Greenhouses. This remake incorporates Chocolate Drop 'SVO,' which is of the highest quality, and Carolina Splendor with its large wine-red flowers of superb shape and form. These will bloom in rich reds to a deep dark oxblood red tones with 4 to 7 flowers held above the foliage. Expect these to be spectacular when they flower in October and November, the dark flower colors will be remarkable.

3" pots \$15

SVO 6982

(Slc. Golden Wax 'Lone Star II' HCC/AOS 1240x Blc. Guess What 'SVO' AM/AOS1130)

Golden Wax is a very productive bloomer with big heads of 15 + waxy yellow flowers; it is a cross between C. Chocolate Drop and Slc. Kauai Starbright. Guess What (Lc. Trick or Treat x Blc. Waikiki Gold) has long lasting flowers 2 months or more, they are bright golden yellow and the 8-9 flowers are well supported on strong stems. This cross is all about a big show of bright yellow flowers. These plants will be spectacular when mature and their bloom season will be in February. Very Limited

3" pots \$14

SVO 7010

(Pot. Twenty-four Carat 'Lea' AM/AOS 4332x Blc. Guess What 'SVO' AM/AOS1130)

Each of these parents can breed for solid or "concolor" flowers. Twenty-four Carat (Pot. Lemon Tree x Blc. Yellow Imp) blooms with 5-6 large well presented flowers in a pure vibrant solid yellow. Guess What (Blc. Waikiki Gold x Lc. Trick or Treat) blooms with 7-8 vibrant yellow-orange flowers held high on a strong stem. This pairing will produce 6-8 intense colored flowers in yellow and orange-yellow on strong stems, very showy.....

3" pots \$14

SVO 7012

(Lc. Trick or Treat 'SVO' 4n 2985x Lc. Trick or Treat 'Orange Magic' AM/AOS3418)

With the recent uptick in the use of Trick or Treat and a parent there are more and more requests for just Trick or Treat. Here is a sib cross with two fine cultivars. 'SVO' has exceptionally bright orange color and 'Orange Magic' has a very high flower count and

its flower color is a deeper orange with just a hint red. These will flower with big heads of starry shaped orange flowers, on tall, robust, and easy to grow plants. They make for marvelous show plants in spring.

3" pots \$14

SVO 7013

Lc. Naranja en Flor

(Lc. Trick of Treat 'Orange Magic 'AM/AOS 3418 x Lc. Spring Fires 'Lenette #3' 1303)

The name of this grex, Naranja en Flor, is Spanish for "Orange in Flower." Over the years, I have been impressed by the breeding qualities of both Trick or Treat and Spring Fires, and I am very confident that these will turn out great! Plants will have strong stems holding 10-15 or more starry red to orange flowers above the foliage in March. Mature plants will be 14-16" tall and produce a spectacular display.

3" pots \$14

SVO 7091

(Blc. Carolina Orange D'or 'Lenette' AM/AOS 1324x Lc. Spring Fires 'Lenette #1' 4248)

The flowers of Carolina Orange D'or are magnificent, with excellent orange color, full shape and 7-9 per stem that it makes a spectacular show. Spring Fires has strong upright stems carrying 5-9 red flowers with darker red lips. Both of these are excellent parent, with dominance for color, strong stems and flower count. With this cross expect extra robust plants will displaying nice heads of 5-7 flowers in orange to a burnt orange/red. These are great plants for March flowers and will become fantastic show plants.

3" pots \$14

SVO 7100

(Pot. Orange Tower 'Orange Glow' x Blc. Carolina Orange D'or 'Lenette #2' AM/AOS 1720)

There is nothing like big heads of orange flowers in spring. Orange Tower (Slc. Wasp Nest x Pot. Love Passion) are intensely colored orange blooms held high on long stems. The flowers of Carolina Orange D'or are magnificent, they have excellent orange color, full shape and with 7-9 blooms per stem it makes a spectacular show. Lots of well displayed pure orange flowers with this cross

3" pots \$14

SVO 7101

(Blc. Carolina Orange D'or 'Lenette #2" AM/AOS 1720 x Lc. Trick or Trick 'SVO' 4n2984)

The flowers of Carolina Orange D'or are magnificent, the orange flowers have full shape and with 7-9 blooms per stem it makes a spectacular show. Trick or Treat 'SVO' blooms with many, bright orange flowers, they are about as orange as you can yet. Here we have excellent shape of Carolina Orange D'or and the high flower count of Trick or Treat this makes for lots of orange flowers of good shape the results of this cross.

3" pots \$14

SVO 7114

(Lc. Tropical Rainbow 'Montclair' 3303x Lc. Spring Fires 'Lenette #1'4248)

Tropical Rainbow (Lc. Commander x Lc. Tropic Glow) can flower with 9 blooms, the flowers are held high and have a red/rose color, and the lip has a nice bright yellow area centrally. Spring Fires (Lc. Fires of Spring x Lc. Fire Island) has strong upright stems carrying 5-9 red flowers with darker red lips. It has proven to be an excellent parent, with dominance for color, strong stems and bloom period. I have been motivated to make these types of hybrids lately as you can read from similar crosses in this list. There is something captivation about plants with big heads of red flowers held above the foliage.

3" pots \$14

SVO 7117

(Blc. Carolina Orange D'or 'Lenette #2" AM/AOS 1720x Lc. Tropical Sunset 'Oceans Heaven'378)

We are always looking for opportunities to make break through crosses, so making a few crosses outside the known boundaries sometimes delivery good results, we are optimistic here.. Over the years we have admired the excellent progeny both of these plants have produced as well as their individual qualities. The flowers of Carolina Orange D'or (Blc. Carolina Golden D'Or x Blc. Malworth D'Or) are magnificent, with excellent orange color, full shape and with blooms 7-9 per stem making a spectacular show. Tropical Sunset (C. Horace x Lc. Tropic Glow) has very showy, large orange flowers with full, dark red lips, well presented on a strong inflorescence; simply put, it is an excellent hybrid! The expectation is for large orange flowers with wide, well rounded petals, the red lips will look fantastic against the orange. Strong stems will be holding 5-7 flowers above the foliage. Orange flowers with red lips are not often seen, this might just the perfect paring!

3" pots \$16

Spotted Cattleyas

SVO 6847

(C. Loddiglossa var. coerulea 'SVO' 2669 x C. Leoloddiglossa 'SVO Speckled Blue' FCC/AOS 3277)

Here we are crossing the very best Leoloddiglossa back to its parent, Loddiglossa. Doing this will reinforce the flower color, count and size. This hybrid will exhibit the exceptional qualities of the coerulea spotted species in its background: *C. loddigesii* f. coerulea, *C. amethystoglossa* f. coerulea and *C. leopoldii* f. coerulea. These plants will carry 15 or more light blue flowers with darker blue spotting. Very collectable!!!

3" pots \$20

SVO 6898

(C. Mark Jones 'SVO' HCC/AOS 6 x C. Chocolate Drop 'SVO' AM/AOS 885)

Mark Jones has been an excellent breeder for spotted flowers; it imparts excellent shape, bold spots and vigorous growing offspring. I think most of the spotting will be lost on the offspring however I believe that its excellent flower shape will dominate. Chocolate Drop will add color, flower count and a shiny/waxy texture and fragrance. This is a summer blooming bifoliate Cattleya, which will produce big heads of waxy red flowers held high over the foliage, with a spicy fragrance. This is a great plant to fill that 'slow' time of the year for Cattleya flowers. Obviously I liked the idea of this cross so much I made it twice SVO 7188 is the exact same thing.

3" pots \$15

SVO 6900

(Blc. Sunspot 'Sandy' AM/AOS 3590 x Slc. Katherine Clarkson 'SVO' HCC/AOS 2145)

This cross will make for well-formed yellow flowers with red spots and flat crimson-red lips. Sunspots (C. Mark Jones x Blc. SunCoast Sunspots) is a very successful cross, with large flower size, good color and excellent spots. Katherine Clarkson (C. Mark Jones x Slc. Jungle Gem) was the first grex with really nice, large yellow flowers and red spots on a compact plant. Mark Jones appears in the background of both parents and has some of the widest petals of any spotted hybrid. I am counting on this influence to widen the petals in this grex. Great color is assured, as both SunCoast Sunspots and Jungle Gem have plenty of vibrant yellow. Plants will mature at 10" tall and start flowering in 3" pots. I made this one twice, it has lots of potential the same cross is SVO 7183.

3" pots \$15

SVO 6986

(Blc. Waianae Leopard 'Chin Hua' HCC/AOS 2154 x Lc. Jalapa 'SVO' Select' 4n 3145)

This is a new style of breeding for red flowers with darker red spots and red lips. Waianae Leopard is a well know spotted breeder. This is a tetraploid or (4n) Jalapa (L. milleri x C. leopoldii) it blooms with 9-12 solid red flowers with dark spots on a sturdy upright stem. This breeding is designed to develop compact plants influenced by L. milleri and have dark red flowers with red spots derived from the influence of leopoldii and Waianae Leopard; strong stems will hold 10 or more flowers.

3" pots \$15

SVO 7121

(C. Landate 'SVO 4n' 1703 x C. Comets Tail 'SVO 4n' 4078)

How cool is this cross? Here is a very advanced spotted bifoliate Cattleya cross and as far as I can tell, this is a first its type in breeding. The parents of Landate are (C. leopoldii x C. aelandiae) and Comets Tail is (C. Landate x C. aelandiae) this combination will result is flowers that look like C. aelandiae on steroids! For all you collectors this is a must have. Very Limited

3" pots \$20

SVO 7158

C. Landate 4n

(C. leopoldii 'SVO Dark Wonder' 4n 3553 x C. aelandiae 'Kathleen III' 4n AM/AOS3591)

This is a rare opportunity to acquire a 4n Landate; when both parents are 4n their offspring will be 4n as well. These two species are highly selected and are spectacular in their own right; it's hard to imagine a better pairing for C. Landate.

3" pots \$20

SVO 7162

(C. leopoldii v. coerulea 'Kathleen' JC/AOS 906 x C. Pittiae v. coerulea 'SVO Best'2662)

This is a great pairing, as it combines the coerulea color form of Pittiae (C. loddigesii x C. schilleriana) with the high flower count of leopoldii. These are going to be coerulea flowers with blue spots, the lip will be dark blue with a contrasting yellow throat. The strong stems will display 10-15 well arranged flowers. Plant size will be a very manageable 12" tall when mature. This is a very collectable hybrid, I can hardly wait to see these bloom.

3" pots \$25

SVO 7183

(Blc. Sunspot 'Sandy' AM/AOS 3590 x Slc. Katherine Clarkson 'SVO' HCC/AOS 2145)

This cross will make for well-formed yellow flowers with red spots and flat crimson-red lips. Sunspots (C. Mark Jones x Blc. SunCoast Sunspots) is a very successful cross, with large flower size, good color and excellent spots. Katherine Clarkson (C. Mark Jones x Slc. Jungle Gem) was the first grex with really nice, large yellow flowers and red spots on a compact plant. Mark Jones appears in the background of both parents and has some of the widest petals of any spotted hybrid. I am counting on this influence to widen the petals in this grex. Great color is assured, as both SunCoast Sunspots and Jungle Gem have plenty of vibrant yellow. Plants will mature at 10" tall and start flowering in 3" pots. The same cross is SVO 6900. I made this one twice, it has lots of potential!

3" pots \$15

SVO 7188

(C. Mark Jones 'SVO' HCC/AOS 886 x C. Chocolate Drop 'SVO' AM/AOS935)

Mark Jones has been an excellent breeder for spotted flowers; it imparts excellent shape, bold spots and vigorous growing offspring. I think most of the spotting will be lost on the offspring however I believe that its excellent flower shape will dominate. Chocolate Drop will add color, flower count and a shiny/waxy texture and fragrance. These is a summer blooming bifoliate Cattleya, which will produce big heads of waxy red flowers held high over the foliage, with a spicy fragrance. This is a great plant to fill that 'slow' time of the year for Cattleya flowers. This is the exact same cross as SVO 6898. I liked the idea of this so much I make it twice.

3" pots \$15

Coerulea (blue) Cattleyas

SVO 6799T

(Lc. Love Knot v. coerulea 'SVO' HCC/AOS 1837 x C. mossiae v. coerulea 'Blue Moon Too' 1690)

Large well formed coerulea flowers on small plants is the expectation here. Love Knot is a small plant that's only 5" tall; it blooms twice a year with 2 to 3 very flat flowers that are nearly 4" across. It is an excellent grower and very showy. The mossiae 'Blue Moon Too' has large 6.5" flowers of good shape and color, 4-5 blooms are produced on strong stems in early May. There are high expectations here; Love Knot is known to flatten flower form and mossiae to give size and bloom period. We are looking forward to seeing the 3-4 large flowers produced from robust plants in May with this one. This is a great and very promising cross.

3" pots \$18

SVO 6815T

C. Gaudii f. coerulea

(C. loddigesii f. coerulea 'Blue Sky' AM/AOS 2176 x C. leopoldii f. coerulea 'Kathleen' JC/AOS 906)

Coerulea color forms of bifoliate cattleyas are rare, and these first hybrids are turning out to be spectacular! I first offered C. Gaudii f. coerulea in 2013, and here is the description I wrote then: *"In the past this grex was called C. Hybrida when C. leopoldii was considered C. guttata. This will be the most desirable as they will be coerulea blue! Bifoliate coerulea flowers are very rare and collectable with the most desirable having blue spots. Mature plants will have heads of 10 or more blue flowers. The first use of coerulea parents in this grex. Don't miss out on these."* Those plants sold out in just a few weeks, and it's been a long wait to produce another batch. Those first plants from 2013 are now reaching maturity and blooming with strong stems of 9-11 flowers in a beautiful shade of coerulea blue with darker spotting. For this remake, the plants have been treated (T) with Oryzalin, a chemical used to convert diploids into tetraploids. I am expecting some exceptional plants from this remake. Limited supply.

3" pots \$20

SVO 6847

(C. Loddiglossa var. coerulea 'SVO' 2669 x C. Leoloddiglossa 'SVO Speckled Blue' FCC/AOS 3277)

Here we are crossing the very best Leoloddiglossa back to its parent, Loddiglossa. Doing this will reinforce the flower color, count and size. This hybrid will exhibit the exceptional qualities of the coerulea spotted species in its background: C. loddigesii f. coerulea, C. amethystoglossa f. coerulea and C. leopoldii f. coerulea. These plants will carry 15 or more light blue flowers with darker blue spotting. Very collectable!!!

3" pots \$20

SVO 6849

C. Becky Culver

(C. Loddiglossa f. coerulea 'SVO' 2669 x C. bicolor f. coerulea 'SVO' 1794)

Loddiglossa (C. loddigesii x C. amethystoglossa) is the parent of several very successful blue spotted hybrids. It blooms with 15+ flowers in light coerulea blue with a few fine blue spots. The addition of bicolor will add a broad lip and deep color. Flowers will be light coerulea with darker coerulea blue lips, and a few may even have green flowers and blue lips. These are growing really well and seem to be very vigorous.

SVO 6932

(Lc. Floralia's Azul 'Sandra' AM/AOS 1404 x Lc. Indigo Love 'Blue Friday' 1833)

One of the most interesting cattleya colors is coerulea. At SVO, we have come a long way in developing coerulea cattleyas and selecting for compact plants that will bloom in 3" to 4" pots. Floralia's Azul is a beautifully formed flower showing the influence of C. walkeriana with wide petals and a broad open lip exposing the column. C. Indigo Love (Indigo Dawn x Love Knot) is a short, compact grower with 2-3 large flowers that are a nice coerulea color with a dark slate-blue lip, it is very impressive and should 'Up the Game' in blue breeding. . So what do we expect from this cross? Improving flower size to 5-6" across while keeping the plant size down and to bloom in 4" pots. Of course coerulea flowers with contrasting darker blue lips. This has real potential!

SVO 6967

(Lc. Indigo Love 'Blue Friday' 1833 x Lc. Lake Tahoe 'SVO' HCC/AOS 700)

Indigo Love (Indigo Dawn x Love Knot) is a short, compact grower with 2-3 surprising large flowers that are a nice coerulea color with a dark slate-blue lip. Lake Tahoe (Lc. Floralia's Azul x L. sincorana) is a very compact growing plant that is free flowering producing blooms several times a year, its flower color is very attractive shade of coerulea. These are going to be producing big flowers on small plants barely 6" tall in shades of coerulea with beautiful darker blue lips.

SVO 6968

(Lc. Indigo Love 'Blue Friday' 1833 x Lc. Sierra Skies 'Leone' 1188)

Indigo Love (Indigo Dawn x Love Knot) is a short, compact grower with 2-3 surprisingly large flowers that are a nice coerulea color with a dark slate-blue lip. Sierra Skies has C. mossiae v. coerulea as a parent that assures good form and size; it is also an excellent grower and bloomer often flowering 2 or 3 times a year with 4-5 well presented blooms. Here we are breeding for 3-4 well held flowers, on modest sized plant maturing at 8-10" tall, and we are expecting these to bloom a couple times a year.

3" pots \$15

SVO 6975

(Lc. Blue Design 'Huge Blue' 1589 x Lc. Sierra Skies 'Leone' 1188)

Blue Design (Lc. Cornelia x Lc. Tahoe Rose) has 6" flowers produced 2-3 at a time on strong stems, with great overall color and a very dark blue lip. Sierra Skies has C. mossiae v. coerulea as a parent that assures good form and size; it is also an excellent grower and bloomer often flowering 2 or 3 times a year with 4-5 well presented blooms. The expectation is for three to four, big 5" flowers produced on good stems, the plants are compact maturing at 8-9" tall plants, with good coerulea color and dark blue lips. 3" pots \$15

SVO 7162

(C. leopoldii v. coerulea 'Kathleen' JC/AOS 906 x C. Pittiae v. coerulea 'SVO Best' 2662)

This is a great pairing, as it combines the coerulea color form of Pittiae (C. loddigesii x C. schilleriana) with the high flower count of leopoldii. These are going to be coerulea flowers with blue spots, the lip will be dark blue with a contrasting yellow throat. The strong stems will display 10-15 well arranged flowers. Plant size will be a very manageable 12" tall when mature. This is a very collectable hybrid, I can hardly wait to see these bloom. Very Limited

Species Cattleyas

SVO 6854

C. violacea v. flamea

(C. violacea v. flamea 'SVO' 3045 x C. violacea V. flamea 'Icabaru' AM/AOS 3044)

Just about the most beautiful color form of C. violacea, these will have pure white flowers, bold magenta flares on the petals and a bright magenta lip. In the past these have been very expensive. I believe orchids should be affordable. C. violacea likes drier conditions and warm nights during winter, with 60-65 degrees as the minimum for good results. Nice, vigorous plants.

SVO 6857T

(L. anceps 'SanBar Super Splash' AM/AOS 3152 x L. anceps v. roebingiana 'Disciplinata' HCC/AOS 1609)

Same as above with one important exception, the protocorms were treated (*T*) in the lab with Oryzalin to produce tetraploid (4n) offspring. The best of these will be very valuable.

3" pots \$25

SVO 6859

(L. anceps v. roeblingiana 'Disciplinata' HCC/AOS 1609 x L. anceps v. roeblingiana 'Anita and Jerry' 2782)

This is second generation v. roeblingiana breeding both parents express the classic marking. A highly collectable color form of this desirable species.

3" pots \$18

SVO 6862t

(L. anceps v. roeblingiana 'Disciplinata' HCC/AOS 1609 x L. anceps var. alba 'Alba Conner' 1603)

While on a speaking tour in Mexico I heard of an amazing hybrid over a fabulous Chili Relleno dinner. As the story goes, there was a cross made where and L. anceps v. alba was crosses with a v. roeblingiana and the offspring came out white with purple flecks! Well, that sounded so amazing I made the cross myself and here it is. These plants have been treated with colchicine in a effort to produce 4n plants.

3" pots \$22

SVO 6863

(L. anceps 'Disciplinata' HCC/AOS 1609 x L. anceps v. alba 'Alba Conner' 1603)

Same as SVO 6862 but not treated with colchicine.

3" pots \$18

SVO 6918

(Psh. cochleata 'Pepe' 4487 x self)

This plant 'Pepe' has an interesting providence. It was collected over 70 years ago in the hills above the town Suchilquitongo in Oaxaca Mexico by a young man (at that time) his responsibility was to pasture the family's goats and cow. After several seasons on the job he began noticing the native orchids flowering in the trees and selected this plant as it was the best he had seen. He brought it down from the hills and established on a tree in his yard where over the years it grew in to a huge specimen. One of my longtime workers asked the now old man for a division. We gave it the cultivar name 'Pepe'. This plant bloom with 11-13 open flowers at one time, not the normal 4-6 blooms usually seen, this high flower count makes it very showy plant. This is a good growing plant that has long lasting flowers and will stay in flower for months on end. It is an excellent beginners plant and is commonly called the "cockle shell orchid"

3" pots \$14

SVO 6923

(C. amethystoglossa 'SVO' 4n 4070 x self)

This is a particularly nice cultivar the petal width is impressive making for flowers with a very full shape. The lips color is a dark amethyst that wraps completely around giving it an 'orlata' type look, which is not often seen in this species but very attractive and distinctive. This plant is a tetraploid so a selfing will produce tetraploid offspring. These are tall growing plants that flower in March.

3" pots \$20

SVO 7002

(*C. trianae* 'Newberry' x *C. trianae* 'Cashens' FCC/AOS4122)

These are two exceptional cultivars; they have excellent floral characteristics with superb petal width, beautiful lips, excellent color, heavy substance and good plant vigor. This is a great pairing and the expectation is for excellent progeny.
